

Recognise

Over a 40 year period, Acxiom has continually invested in bureau technology and processes, enabling our clients to benefit from speed of throughput, accuracy of data processing and importantly, lower costs. No matter what the size or scale of our clients' databases, the business issues they face or the industry they're in, our bureau services bring them leading edge solutions.

With the launch of Acxiom Bundles, we have been able to pre-package our bureau services into a format that allows us to cut our internal processing and people costs, savings which we are in turn then able to pass on to our clients. As such we are pleased to be able to offer our clients the benefits of Acxiom's bureau services for a fraction of the price of not only Acxiom's existing bureau services rate card, but standard bureau pricing in the market. Analysis has shown that the Bundles offer up to 53% reduction over a typical bureau for the equivalent piece of work.

The Recognise bundle focuses on improving the view of the consumer. Using Acxiom's patented linking technology and recognition management capabilities, we improve your view of customer relationships.

- People move, change their names, add or change contact information; children start driving or leave the house.
- The Recognise bundle builds on the foundations of the Clean bundle and using our unique Abilitec Knowledgebase allows us to identify and track common individuals even if they move house or change their name through marriage.
